

Wing plate as OPC 13668

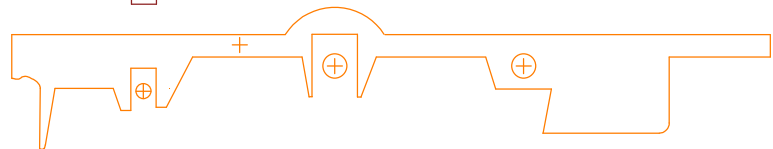

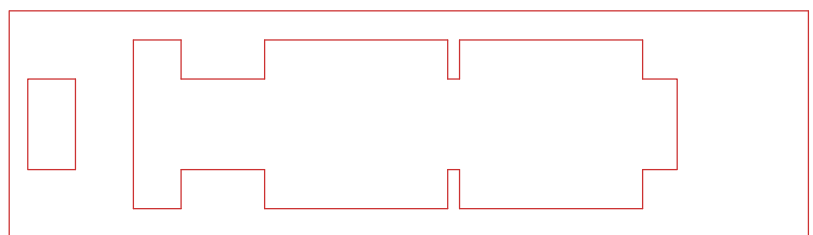

Boiler centre line

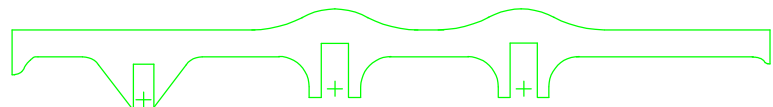

Make splashers 6'1" diameter [6' plus splasher top thickness];
 5'8" Markit wheels (I have in stock); outside measure 5'11";
 Driving wheel separation increased by 4"; use spare etched 6'3" coupling rods;
 Frames etc extended 2" at rear

Profile milling or fret cutting plans:
 Footplate driving wheel cuts each 3.5" longer to allow for curve
 [MAY NEED TO expand each a little more to clear]

Single stage drive to rear wheel

Curves in footplate added from drawings of locos 8/9
 on assumption that Bennett drawing (after Battley)
 must be wrong.
